CONTENTS

NUMBER 1

iii Editorial

V. YE SMORODIN — 1 Endothermal wetting effect and ice nucleation mechanisms of silver iodide

F. SLOOTMAN and J.-C. PARENT — 15 Homogeneous gas-phase nucleation in silane pyrolysis

M. P. ANISIMOV, K. HÄMERI and M. KULMALA — 23 Construction and test of laminar flow diffusion chamber: homogeneous nucleation of DBP and *n*-hexanol

W. R. FOSS and E. J. DAVIS — 33 Formulation of coated aerosol particles by simultaneous diffusion and chemical reaction

S. HEIDENREICH — 49 Condensation droplet growth in the continuum regime—a critical review for the system air–water

P. ROTH and A. HOSPITAL — 61 Design and test of a particle mass spectrometer (PMS)

S. NYEKI and I. COLBECK — 75 The measurement of the fractal dimension of individual *in situ* soot agglomerates using a modified Millikan cell technique

A. LI, G. AHMADI, R. G. BAYER and M. A. GAYNES — 91 Aerosol particle deposition in an obstructed turbulent duct flow

O. BERNSTEIN and M. SHAPIRO — 113 Direct determination of the orientation distribution function of cylindrical particles immersed in laminar and turbulent shear flows

M. KRÄMER and L. SCHÜTZ — 137 On the collection efficiency of a rotating arm collector and its applicability to cloud- and fogwater sampling

R. C. BROWN, D. WAKE, A. THORPE, M. A. HEMINGWAY and M. W. ROFF — 149 Theory and measurement of the capture of charged dust particles by electrets

S. FUERSTENAU, A. GOMEZ and J. FERNÁNDEZ DE LA MORA — 165 Visualization of aerodynamically focused subsonic aerosol jets

A. R. CLARK and M. EGAN — 175 Modelling the deposition of inhaled powdered drug areosols

R. S. PILLAI, D. B. YEATES, M. ELJAMAL, I. F. MILLER and A. J. HICKEY — 187 Generation of concentrated aerosols for inhalation studies

J. C. STRONG, D. A. KNIGHT and A. BLACK — 199 A novel method for the radiolabelling of the particulate phase of environmental tobacco smoke

209 The Max Planck Research Award

211 The Smoluchowski Award (GAeF)

213 Book Review

215 Announcement

217 News Pages

NUMBER 2

iii Obituary Notice: Friedrich Löffler (1933–1994)

Tutorial/Review

J. PORSTENDÖRFER — 219 Properties and behaviour of radon and thoron and their decay products in the air

General Papers

G. SPANNER, H. SCHRÖDER, A. PETZOLD and R. NIESSNER — 265 Generation of carbon aerosols by fragmentation of acetylene in a laser-induced plasma

Y. S. MAYYA — 277 Charging-induced drift and diffusion of aerosol particles in oscillating electric fields

R. B. JACKO and D. A. REED — 289 A banded double ring electrodynamic balance for the suspension of submillimeter sized particles

B. V. RAMARAO, C. TIEN and S. MOHAN — 295 Calculation of single fiber efficiencies for interception and impaction with superposed Brownian motion

J. W. GENTRY, J. GEBHART and G. SCHEUCH — 315 A vector model for the total aerosol deposition efficiency under the simultaneous action of more than one mechanism

D. B. INGHAM and B. YAN — 327 Re-entrainment of particles on the outer wall of a cylindrical blunt sampler

A. S. SKAPTSOV and G. N. LIPATOV — 341 On the interpretation of rectangular diffusion battery data

A. WIEDENSOHLER, M. KRÄMER and H.-C. HANSSON — 345 A new method to measure the size distribution of insoluble submicron particles in water

D. J. HALL and M. A. EMMOTT — 355 Some comments on the effects of atmospheric turbulence on ambient particle samplers

R. EIDEN, J. BURKHARDT and O. BURKHARDT — 367 Atmospheric aerosol particles and their role in the formation of dew on the surface of plant leaves

P. K. KOUTSENOGII and R. JAENICKE — 377 Number concentration and size distribution of atmospheric aerosol in Siberia

D. A. JAPUNTICH, J. I. T. STENHOUSE and B. Y. H. LIU — 385 Experimental results of solid monodisperse particle clogging of fibrous filters

P. K. HOPKE, B. JENSEN and N. MONTASSIER — 395 Evaluation of several air cleaners for reducing indoor radon progeny

C. P. YU, L. ZHANG, G. OBERDÖRSTER, R. W. MAST, L. R. GLASS and M. J. UTELL — 407 Deposition modeling of refractory ceramic fibers in the rat lung

Technical Note
P. TAYLOR, R. DUDEK, D. FLAHERTY and T. KAEMPFE — 419 Evaluation of two instruments for the measurement of aerosols

425 Announcements

427 News Page

NUMBER 3

J. K. JOKINIEMI, M. LAZARIDIS, K. E. J. LEHTINEN and E. I. KAUPPINEN — 429 Numerical simulation of vapour–aerosol dynamics in combustion processes

PO-FU HUANG, B. J. TURPIN, M. J. PIPHO, D. B. KITTELSON and P. H. MCMURRY — 447 Effects of water condensation and evaporation on diesel chain-agglomerate morphology

R. S. PILLAI, D. B. YEATES, I. F. MILLER and A. J. HICKEY — 461 Controlled release from condensation coated respirable aerosol particles

K. H. FUNG, D. G. IMRE and I. N. TANG — 479 Detection limits for sulfates and nitrates in aerosol particles by Raman spectroscopy

M. R. ZACHARIAH and D. R. F. BURGESS JR — 487 Strategies for laser excited fluorescence spectroscopy. Measurements of gas phase species during particle formation

R. J. HAN and J. W. GENTRY — 499 Evolution of charge distributions of non-spherical particles undergoing unipolar charging

S. K. LOYALKA and J. L. GRIFFIN — 509 Rotation of non-spherical axi-symmetric particles in the slip regime

D. LESNIC, L. ELLIOTT and D. B. INGHAM — 527 The influence of separation on the collection efficiencies of obstacles

D. B. INGHAM and B. YAN — 535 The effect of a cylindrical backing body on the sampling efficiency of a cylindrical sampler

D. A. EDWARDS — 543 A general theory of the macrotransport of non-depositing particles in the lung by convective dispersion

C. S. KIM, D. M. FISHER, D. J. LUTZ and T. R. GERRITY — 567 Particle deposition in bifurcating airway models with varying airway geometry

T. SCHNEIDER, M. BOHGARD and A. GUDMUNDSSON — 583 A semiempirical model for particle deposition onto facial skin and eyes. Role of air currents and electric fields

595 Announcements

597 News Page

NUMBER 4

T. MATSOUKAS — 599 Charge distributions in bipolar particle charging

A. V. FILIPPOV — 611 Charge distribution among non-spherical particles in a bipolar ion environment

Y. S. MAYYA — 617 On the "Boltzmann law" in bipolar charging

C. F. CLEMENT, D. M. J. CALDERBANK and R. G. HARRISON — 623 Radioactive aerosol charging with spatially varying ion concentrations

A. WIEDENSOHLER, P. BÜSCHER, H.-C. HANSSON, B. G. MARTINSSON, F. STRATMANN, G. FERRON and B. BUSCH — 639 A novel unipolar charger for ultrafine aerosol particles with minimal particle losses

P. BÜSCHER, A. SCHMIDT-OTT and A. WIEDENSOHLER — 651 Performance of a unipolar "square wave" diffusion charger with variable *nt*-product

S. OPIOLKA, F. SCHMIDT and H. FISSAN — 665 Combined effects of electrophoresis and thermophoresis on particle deposition onto flat surfaces

B. GORBUNOV and A. SAFATOV — 673 *In situ* measurements of the ice-forming activity of metal oxide aerosols with controlled amounts of surface active groups

J. C. BARRETT — 683 Cluster definitions in nucleation theory

A. G. B. M. SASSE, A. J. GADGIL and W. W. NAZAROFF — 689 On the measurement of ^{218}Po diffusivity using the two-filter method

K. W. LEE and J. A. GIESEKE — 699 Deposition of particles in turbulent pipe flows

B. ASGHARIAN and S. ANJILVEL 711 A Monte Carlo calculation of the deposition efficiency of inhaled particles in lower airways

R. F. PHALEN, R. C. MANNIX and M. J. OLDHAM 723 Sidestream cigarette smoke deposition in surrogate nasal models

M. FICHMAN and N. K. ANAND 731 Comments (and reply) on the paper "Characterization of the aerosol particle lift force" (by B. Fan, A. R. McFarland and N. K. Anand)

733 Abstracts of the Annual Symposium of the Nordic Aerosol Society (NOSA)

741 News Page

NUMBER 5

Special Issue: Resuspension in the Outdoor Environment

K. W. NICHOLSON 743 Guest Editorial

E. K. GARGER 745 Air concentrations of radionuclides in the vicinity of Chernobyl and the effects of resuspension

V. A. KASHPAROV, V. P. PROTSAK, Y. A. IVANOV and K. W. NICHOLSON 755 Resuspension of radionuclides and the contamination of village areas around Chernobyl

V. A. KASHPAROV, V. P. PROTSAK, V. I. YOSCHENKO and J. D. WATTERSON 761 Inhalation of radionuclides during agricultural work in areas contaminated as a result of the Chernobyl reactor accident

E. K. GARGER, V. A. KASHPUR, B. I. GURGULA, H. G. PARETZKE and J. TSCHIERSCH 767 Statistical characteristics of the activity concentration in the surface layer of the atmosphere in the 30 km zone of Chernobyl

A. A. TER-SAAKOV, M. V. GLEBOV, S. K. GORDEEV, A. I. ERMAKOV, YU. L. LUCHKIN and A. A. KHILOV 779 An experimental study of the radioactivity associated with soil and dust particles in the vicinity of the Chernobyl nuclear power plant

W. HOLLÄNDER 789 Resuspension factors of ^{137}Cs in Hannover after the Chernobyl accident

J. A. GARLAND and I. R. POMEROY 793 Resuspension of fall-out material following the Chernobyl accident

K. W. NICHOLSON and M. J. FULKER 807 The atmosphere–surface exchange of radionuclides at the Sellafield reprocessing plant

M. A. PIRES DO RIO, E. C. S. AMARAL and H. G. PARETZKE 821 The resuspension and redeposition of ^{137}Cs in an urban area: the experience after the Goiânia accident

E. IRANZO, A. ESPINOSA and J. MARTINEZ 833 Resuspension in the Palomares area of Spain: a summary of experimental studies

P. Giess, A. J. H. Goddard, G. Shaw and D. Allen — 843 Resuspension of monodisperse particles from short grass swards: a wind tunnel study

M. V. Buikov — 859 The pollution exchange between soil and the near-surface air layer through turbulent transfer, resuspension and dry deposition

Regular Papers

V. Stoyanova, D. Kashchiev and T. Kupenova — 867 Freezing of water droplets seeded with atmospheric aerosols and ice nucleation activity of the aerosols

S. Sakata and T. Okada — 879 Effect of humidity on hydrated cluster-ion formation in a clean room corona discharge neutralizer

M. A. van Drunen, I. L. Tuinman, J. C. M. Marijnissen, H. G. Merkus and B. Scarlett — 895 Measurement of aerosols in a silicon nitride flame by optical fiber photon correlation spectroscopy

D. S. Surya Narayana, A. R. Sundararajan and J. Harvey — 909 Characterization of uranium oxide aerosols

W. S. Poon, D. Y. H. Pui, Chung-Te Lee and B. Y. H. Liu — 923 A compact porous-metal denuder for atmospheric sampling of inorganic aerosols

I. P. Chung, T. Trinh and D. Dunn-Rankin — 935 Experimental investigation of a two-dimensional cylindrical sampler

G. Scheuch — 957 Particle recovery from human conducting airways after shallow aerosol bolus inhalation

W. Stöber, P. E. Morrow, W. Koch and G. Morawietz — 975 Alveolar clearance and retention of inhaled insoluble particles in rats simulated by a model inferring macrophage particle load distributions

1003 News Pages

NUMBER 6

Special Issue: Electrosprays: Theory and Applications

J. H. Vincent — vii Editorial

J. M. Grace and J. C. M. Marijnissen — 1005 A review of liquid atomization by electrical means

M. Cloupeau and B. Prunet-Foch — 1021 Electrohydrodynamic spraying functioning modes: a critical review

A. J. Mestel — 1037 The electrohydrodynamic cone-jet at high Reynolds number

V. Shtern and A. Barrero — 1049 Striking features of fluid flows in Taylor cones related to electrosprays

C. PANTANO, A. M. GAÑÁN-CALVO and A. BARRERO — 1065 Zeroth-order, electrohydrostatic solution for electrospraying in cone-jet mode

A. I. GRIGOR'EV and S. O. SHIRYAEVA — 1079 The theoretical consideration of physical regularities of electrostatic dispersion of liquids as aerosols

J. ROSELL-LLOMPART and J. FERNÁNDEZ DE LA MORA — 1093 Generation of monodisperse droplets 0.3 to 4 μm in diameter from electrified cone-jets of highly conducting and viscous liquids

A. M. GAÑÁN-CALVO, J. C. LASHERAS, J. DÁVILA and A. BARRERO — 1121 The electrostatic spray emitted from an electrified conical meniscus

M. CLOUPEAU — 1143 Recipes for use of EHD spraying in cone-jet mode and notes on corona discharge effects

A. J. KELLY — 1159 On the statistical, quantum and practical mechanics of electrostatic atomization

E. J. DAVIS and M. A. BRIDGES — 1179 The Rayleigh limit of charge revisited: light scattering from exploding droplets

A. A. NAQWI — 1201 *In situ* measurement of submicron droplets in electrosprays using a planar phase Doppler system

P. F. DUNN, J. M. GRACE and S. R. SNARSKI — 1213 The mixing of electrically-charged droplets between and within electrohydrodynamic fine sprays

A. A. VAN ZOMEREN, E. M. KELDER, J. C. M. MARIJNISSEN and J. SCHOONMAN — 1229 The production of thin films of $LiMn_2O_4$ by electrospraying

K. TANG and A. GOMEZ — 1237 Generation by electrospray of monodisperse water droplets for targeted drug delivery by inhalation

1251 News Pages

NUMBER 7

1253 Charles Norman Davies: *In Memoriam*

1269 Obituary Notice: Günter Zebel (1922–1994)

J. L. GRIFFIN and S. K. LOYALKA — 1271 Vapor condensation on multiple spheres and spheroids in the near-continuum regime

F. E. KRUIS, J. SCHOONMAN and B. SCARLETT — 1291 Homogeneous nucleation of silicon

F. Stratmann, E. Otto and H. Fissan 1305 Thermophoretical and diffusional particle transport in cooled laminar tube flow

C. Sioutas, P. Koutrakis and R. M. Burton 1321 Development of a low cutpoint slit virtual impactor for sampling ambient fine particles

D. H. Bache 1331 Spray deposition on sparse targets

W. Li and P. K. Hopke 1341 Hygroscopicity of consumer spray product aerosol particles

A. G. Girin and N. Kh. Kopyt 1353 Generation of fine aerosol as a dispersion of unstable fusion film of ablating meteoroid

1359 COFERA Days

1367 Smoluchowski Award: 1994 Recipients

NUMBER 8

Special Issue: Bioaerosols

J. Ho and W. David Griffiths 1369 Guest Editorial

J. Lacey and J. Dutkiewicz 1371 Bioaerosols and occupational lung disease

T. M. Madelin 1405 Fungal aerosols: a review

V. V. Alekseev, N. G. Tikhonov, S. T. Savchenko, V. Ya. Kurilov, T. N. Vjazmina, A. T. Yakovlev, I. I. Denisov and S. F. Popov 1413 Experimental bacterial aerosols: some physical and biological (pathogenic) properties

W. D. Griffiths and G. A. L. DeCosemo 1425 The assessment of bioaerosols: a critical review

E. W. Henningson and M. S. Ahlberg 1459 Evaluation of microbiological aerosol samplers: a review

S. L. Upton, D. Mark, E. J. Douglass, D. J. Hall and W. D. Griffiths 1493 A wind tunnel evaluation of the physical sampling efficiencies of three bioaerosol samplers

S. A. Grinshpun, C.-W. Chang, A. Nevalainen and K. Willeke 1503 Inlet characteristics of bioaerosol samplers

T. J. Mukoda, L. A. Todd and M. D. Sobsey 1523 PCR and gene probes for detecting bioaerosols

K. R. Spurny 1533 On the chemical detection of bioaerosols

B. T. N. Evans, E. Yee, G. Roy and J. Ho 1549 Remote detection and mapping of bioaerosols

L. M. BROSSEAU, S.-K. CHEN, D. VESLEY and J. H. VINCENT 1567 System design and test method for measuring respirator filter efficiency using mycobacterium aerosols

M. W. THOMPSON, J. DONNELLY, S. A. GRINSHPUN, A. JUOZAITIS and K. WILLEKE 1579 Method and test system for evaluation of bioaerosol samplers

T. REPONEN, A. HYVÄRINEN, J. RUUSKANEN, T. RAUNEMAA and A. NEVALAINEN 1595 Comparison of concentrations and size distributions of fungal spores in buildings with and without mould problems

S. MATTHIAS-MASER and R. JAENICKE 1605 Examination of atmospheric bioaerosol particles with radii $>0.2\,\mu$m

SUPPLEMENT 1

ABSTRACTS OF THE 1994 EUROPEAN AEROSOL CONFERENCE

Editors' Preface xxiii

Plenary Lecture

01.O.01 Past aerosol composition from ice core studies. R. DELMAS S1

Aerosols in the Environment I

02.O.01 The effect of ozone on the photoactivity and the aerodynamic diameter of photoelectrically charged aerosols. D. MATTER, M. MOHR, H. BURTSCHER and H. C. SIEGMANN S3

02.O.02 Investigations of aerosol optical depth variations using spectroradiometer at an urban station, Pune, India. P. C. S. DEVARA, G. PANDITHURAI, P. E. RAJ and S. SHARMA S5

02.O.03 Inlet, collection and analysis characteristics of bioaerosol samplers and development of new ones. S. A. GRINSHPUN, K. WILLEKE, J. DONNELLY, S. TERZIEVA, C.-W. CHANG, A. JUOZAITIS and V. ULEVICIUS S7

02.O.04 Field measurements of dry deposition and deposition velocity of aerosol particles into a spruce forest ecosystem using a surface wash-off method. M. MARQUES, J. CONSTANTIN, A. IBROM and G. GRAVENHORST S9

02.O.05 Nucleation studies of H_2SO_4-particles in a vertical laminar flow reactor: experimental results and comparison with a numerical model. B. ROTH, R. VAN DINGENEN and F. RAES S11

Filtration

03.O.01 An analytical model for aerosol collection in nonuniform filter media. M. SHAPIRO S13

N/A indicates that the abstract was not available at the time of going to press.

03.O.02 Electrically enhanced deposition in metal filter arrays. K. SOMMERER, J. W. GENTRY, G. SCHEUCH and J. GEBHART S15

03.O.03 A new experimental method for measuring fibrous filters efficiency at low pressure conditions. M. B. ATTOUI, A. RENOUX and D. BOULAUD S17

03.O.04 Bioaerosol collection and growth on filters used for building ventilation. T. H. KUEHN, D. Y. H. PUI, D. VESLEY, S. J. KEMP, A. STREIFEL, J. MARX and A. ALFRED S19

03.O.05 Air cleaning by low frequency acoustic wave. A. SADIGZADEH S21

Aerosols in the Environment II

04.O.01 Atmospheric aerosols, atmospheric optics and visibility. H. HORVATH S23

04.O.02 Number concentrations of atmospheric aerosol in the Finnish arctic. A. VIRKKULA, R. E. HILLAMO, M. MÄKINEN, T. MÄKELÄ and T. A. PAKKANEN S25

04.O.03 On aerosol optical thickness monitoring in central Europe and some derived results. M. WELLER and U. LEITERER S27

04.O.04 Modeling global distribution of 222Rn, 210Pb and 7Be in the atmosphere with General Circulation Models. A. ARMENGAUD and C. GENTHON S29

04.O.05 A study on the sources of air pollutants observed in Tjörn, Sweden. A. FAN, P. K. HOPKE, T. M. RAUNEMAA and M. ÖBLAD S31

04.O.06 Mt. Pinatubo aerosol as a tracer of south polar transport: based on SAGE II satellite measurements. V. K. SAXENA and J. ANDERSON S33

Aerosol Production Technology and Industrial Aerosols I

05.O.01 Multicomponent nanophase materials formation by gas-phase reactions of volatile precursors. A. S. GURAV, T. T. KODAS and M. J. HAMPDEN-SMITH S35

05.O.02 Characterization of emissions generated during laser material processing and emission formation process. H. HAFERKAMP, K. ENGEL, M. GOEDE and T. PÜSTER S37

05.O.03 Generation of metallic nanoparticles by aerosol process: dependence of particle size on medium gas pressure. S. TOHNO, M. ITOH and H. TAKANO S39

05.O.04 Generation of aerosol particles by spark discharges in a capillary tube under air flow with trace volatile organic compounds. H. KOHNO, S. HONDA, T. YAMAMOTO, J. S. CHANG and A. A. BEREZIN S41

05.O.05 Study of the controlled fragmentation of liquid jets generated from a spinning-disk and realization of a monodispersed droplets generator. J.-M. CHICHEPORTICHE and P.-Y. CHANAL S43

05.O.06 Vapor phase synthesis of silica particles. J. SMOLÍK and P. MORAVEC S45

Aerosols in the Environment III

06.O.01 The vertical structure of atmospheric aerosol size distributions—examples from the Arctic Haze. V. DREILING and R. JAENICKE S47

06.O.02 Metal aerosol concentrations at a refuse site. I. COLBECK and K. ELEFTHERIADIS S49

06.O.03 Occurrence of a separate ultrafine aerosol mode in the arctic marine boundary layer. A. WIEDENSOHLER, D. S. COVERT, E. SWIETLICKI, P. AALTO and J. HEINTZENBERG S51

06.O.04 Characteristics of Vienna aerosols sampled using rotating cascade impactor. M. KASAHARA, K. TAKAHASHI, A. BERNER and O. PREINING S53

06.O.05 Size distribution of atmospheric particles containing Beryllium-7. C. LANGE S55

Aerosol Production Technology and Industrial Aerosols II

07.O.01 Lead dynamics during the synthesis of (Bi, Pb)-Sr-Ca-Cu-O powders via aerosol decomposition. E. I. KAUPPINEN, J. JOUTSENSAARI, R. ZILLIACUS, A. S. GURAV and T. T. KODAS S57

07.O.02 Properties of aerogels fabricated by an aerosol process. B. SCHLEICHER and S. K. FRIEDLANDER S59

07.O.03 Analysis of combustion aerosol from package material. J. W. G. BENTZ, M. FICHTNER, J. GOSCHNICK, H.-J. ACHE, P. BASMER and P. G. SEEGER S61

07.O.04 Controlled surface contamination. B. MESBAH, M. POURPRIX, A. RENOUX and D. BOULAUD S63

07.O.05 Effect of ferrocene additive on the flame synthesis of silica particles. G. P. FOTOU, S. J. SCOTT and S. E. PRATSINIS S65

Radioactive and Nuclear Aerosol I

08.O.01 Airborne radon daughter particles. G. TYMEN S67

08.O.02 Size distribution of "unattached" short-lived radon decay products in dwellings. A. REINEKING, J. PORSTENDÖRFER and G. BUTTERWECK S69

08.O.03 Measurements of ^{214}Pb loss by recoil from decay of ^{218}Po collected on a wire screen. E. O. KNUTSON and A. C. GEORGE S71

08.O.04 Radon and radon decay products behaviour in a house: comparison between modelling and measurements. A. M. GOURONNEC, F. GOUTELARD, G. TYMEN, N. MONTASSIER, D. BOULAUD and A. RENOUX S73

08.O.05 Determination of the activity-size distribution of radioactive aerosols released from the planned waste repository Konrad. H. P. BERG, H. J. FETT, F. LANGE, R. MARTENS, J. PORSTENDÖRFER and A. REINEKING S75

Fundamentals I

09.O.01 Modeling of particle transport in aerosol flows impinging onto flat surfaces. H. FISSAN, F. SCHMIDT, B. Y. H. LIU and D. Y. H. PUI S77

09.O.02 Charging-induced drift and diffusion in aerosols. Y. S. MAYYA and W. HOLLANDER S79

09.O.03 Experimental study of particle transport due to thermophoresis and sedimentation in a vacuum chamber. F. SCHMIDT, F. STRATMANN, H. FISSAN, R. PERIASAMY, R. P. DONOVAN and D. S. ENSOR S81

09.O.04 Equilibrium charge distribution among aerosol particles of arbitrary shape. A. V. FILIPPOV S83

09.O.05 On the reduction of blowout from deposition gauges. N. DOMBROWSKI, E. A. FOUMENY, D. B. INGHAM and Y. D. QI S85

Radioactive and Nuclear Aerosol II

10.O.01 The fission product aerosols in the programmes HEVA and VERCORS. J. P. LEVEQUE and D. BOULAUD S87

10.O.02 Two-dimensional analysis of the thermohydraulic and aerosol behaviour in the PHEBUS-FPT0-contaminant vessel. J. LANGHANS S89

10.O.03 Description of fission products transport with the SOPHAEROS code during reactor severe accidents. M. CRANGA and J. L. CHEISSOUX S91

10.O.04 The effect of binary condensation of post-test calculations for the integral test FAL-18. M. LAZARIDIS, J. A. CAPITÃO and Y. DROSSINOS S93

10.O.05 First results of the K A E V E R project on aerosol behaviour in LWR-containments. H. G. SCHEIBEL, G. POSS and D. WEBER S95

Fundamentals II

11.O.01 Experimental study of condensational particle growth in nitric acid–water vapor mixtures at nearly ambient pressures and temperatures. R. RUDOLF and P. E. WAGNER S97

11.O.02 Evaporation of a drop. A temperature dependent mass transfer correlation. J. SMOLÍK, M. KULMALA, J. SCHWARZ and T. VESALA S99

11.O.03 Monte Carlo simulations of heterogeneous nucleation on aerosol particles in the non-uniform media. E. L. ZAPADINSKY, K. K. SABELFELD, M. KULMALA, B. Z. GORBUNOV and D. M. RACKIMGULOVA S101

11.O.04 Measurement of the bond strength between nanosized aerosol particles. A. P. WEBER and S. K. FRIEDLANDER S103

11.O.05 Surface effects on single optically levitated DEHS-particles. T. KAISER, G. ROLL and G. SCHWEIGER S105

Invited Papers

12.O.01 Advances in microcontamination research. D. Y. H. PUI and B. Y. H. LIU S107

13.O.01 The origin of aerobiology. R. MOREAU S109

Aerosols in the Environment

14.P.01 Size-fractionating sampler for giant particles. F. WAGENPFEIL, T. HÄRTL and J. TSCHIERSCH S111

14.P.02 Size distribution and photoelectric activity of particles in wood combustion exhaust. CH. HÜGLIN, CH. GAEGAUF and H. BURTSCHER S113

14.P.03 Aerosol size distribution during resuspension periods in a semi-arid region. E. SERIE and A. CHAPUIS S115

14.P.04 Physical and optical/radiative properties of stratospheric aerosols. R. F. PUESCHEL and S. A. KINNE S117

14.P.05 Contamination of insects of the order Lepidoptera and air pollution. E. NAUMOVA, B. GORBUNOV, O. ROZHINA, N. MEZENTZEV and A. KNOR S119

14.P.06 Formation and transfer of toxic gas-aerosol products during forest fires. A. V. SAVCHENKO, V. V. SMIRNOV and A. D. UVAROV S121

14.P.07 Atmospheric aerosol in the surroundings of large dried pools. V. V. SMIRNOV, D. A. GILLETTE and L. GOMES S123

14.P.08 A quantitative determination of aerosol sources in the Milan area. G. MANINI, M. MAUGERI, A. ROCCA and A. NOVO S125

14.P.09 Heterogeneous SO_2 and NO_2 removal in a marine atmosphere. W. WEISWEILER and G. GUND S127

14.P.10 Heterogeneous nucleation of organics to salt particles. H. C. HANSSON, D. S. ORSINI, A. WIEDENSOHLER and M. ROOD S129

14.P.11 Black carbon to aerosol characteristics in remote areas. T. RAUNEMAA, K. KUUSPALO, T. ÅLANDER, A. MIRME, E. TAMM, U. KIKAS and V. LAINE S131

14.P.12 Long-range atmospheric transport of aerosols to the southern Indian Ocean (Amsterdam Island: 37° 48′ S 77° 34′ E). U. EZAT, H. CACHIER, G. POLIAN and B. ARDOUIN S133

14.P.13 A simple dispersion model to estimate the long term average concentration of SPM: a case study. S. K. PATTNAIK, S. K. BISWAL and N. K. PATTNAIK S135

14.P.14 Trimodal submicrometer aerosol number size distribution in the Arctic marine boundary layer. D. S. COVERT, A. WIEDENSOHLER, P. AALTO, J. HEINTZENBERG and P. H. MCMURRY S137

14.P.15 Results of long-term airborne aerosol sounding over the former Soviet Union. B. D. BELAN, V. E. ZUEV and M. V. PANCHENKO S139

14.P.16 Size analysis of airborne bacteria by an optical particle counter and an impactor. R. MAUS and F. LÖFFLER S141

14.P.17 The growth of atmospheric particles in moist air. B. BUSCH, G. FERRON, E. KARG, A. SILBERG and J. HEYDER S143

14.P.18 Ice nuclei in different fractions of atmospheric aerosol. I. P. PARSHUTKINA, N. O. PLAUDE and M. V. VYCHUZHANINA S145

14.P.19 Night-time aerosol optical thickness measurements by starlight—A German–Russian project. A. NAEBERT, U. LEITERER, M. WELLER and G. ALEKSEEVA S147

14.P.20 Characterization of fog droplet residues and interstitial particles by laser microprobe mass spectrometry. R. GIERAY and P. WIESER S149

14.P.22 Hydration properties of atmospheric aerosol. A. JUOZAITIS, G. MAINELIS, S. TRAKUMAS and V. ULEVICIUS S151

14.P.23 Aerosol element composition and long-range atmospheric transport of pollutants (three spring seasons in the center of the Russian Arctic). A. A. VINOGRADOVA S153

14.P.24 The use of manikin for testing personal aerosol samplers. D. R. BRADLEY, A. E. JOHNSON, L. C. KENNY, C. P. LYONS, D. MARK and S. L. UPTON S155

14.P.25 Validation procedures for the FAG 62 I-N dust monitor used in the national air quality monitoring network. B. G. VAN ELZAKKER and P. SWAAN S157

14.P.26 PM_{10} concentrations and aerosol particle size distribution in outdoor air in eight regions of Switzerland. CH. MONN, G. SCHAEPPI, O. BRAENDLI, PH. LEUENBERGER and SAPALDIA team S159

14.P.27 The experience of aircraft aerosol investigations in Aral Sea region. A. A. SINKEVICH, A. D. EGOROV and V. F. ZHVALEV S161

14.P.28 Relationships between chemical constituents in atmospheric aerosol and precipitation water samples. G. KMIEĆ and K. KACPERCZYK S163

14.P.29 Analytical model of sulphate layer in stratosphere: effects of aircrafts. A. A. SOROKIN S165

14.P.30 Effect of electric field on the collection efficiency of large water drops collecting micron-sized aerosol particles. T. S. PRANESHA and A. K. KAMRA S167

14.P.31 Size distribution and anion composition of atmospheric aerosol in the Novosibirsk region. P. K. KOUTSENOGII, N. S. BUFETOV, E. I. KIROV, K. P. KOUTZENOGII, V. I. MAKAROV, A. M. NEMIROVSKI, B. S. SMOLJAKOV and S. I. SHUJSKI S169

14.P.32 Volcanic pertubation of the polar atmosphere observed with different remote sensing instruments. A. HERBER, G. BEYERLE, L. W. THOMASON and K. DETHLOFF S171

14.P.33 Background aerosol on Mediterranean coast. S. DESPIAU, J. PIAZZOLA, S. COUGNENC, C. TIRET and P. BINDER S173

14.P.34 Polarographic methods for determination microconcentrations of paraquat and diquat in the air. E. S. COHEN S175

14.P.35 The use of the electrostatic charged aerosol monitor (ECAM) for activated airborne particle observation. R. A. Roos S177

14.P.36 Time changes of aerosol influence on solar radiation. J. Lukáč S179

14.P.37 Change in the submicron particle size distribution during a cloud process measured with three DMPS systems. A. Wiedensohler, M. Wendisch, H.-C. Hansson and D. Orsini S181

14.P.38 Characteristics and distribution of major ions of atmospheric aerosols in a semi-arid region of India. U. C. Kulshrestha, N. Kumar, A. Saxena, K. M. Kumari and S. S. Srivastava S183

14.P.39 Aerosol measurements at high-alpine sites with the epiphaniometer. U. Baltensperger, H. W. Gäggeler, D. T. Jost, M. Schwikowski and P. Seibert S185

14.P.40 Atmospheric microbial contamination in Marseilles and Porquerolles. C. Di Giorgio, A. Krempff, G. Dumenil, C. Tiret and P. Binder S187

14.P.41 Study of aerosol black carbon in real time. S. M. Pyrogov and A. A. Kornejev N/A

Filtration

15.P.01 Theoretical and experimental study of fibrous filters loading with liquid aerosols in the inertial regime. R. Gougeon, D. Boulaud and A. Renoux S189

15.P.02 Charge distribution on elongated aerosol particles. P. Grzybowski and L. Gradoń S191

15.P.03 Comparative study on filtration efficiency of fibrous flexible and stiff spherical solid aerosol particles. A. Podgórski S193

15.P.04 Effect of external electrostatic field on filtration efficiency of fibrous filters. Experimental studies and numerical simulations. J. Luckner, Z. Wertejuk and A. Podgórski S195

15.P.05 Characterization of aerosols penetration through protective suits. P.-Y. Chanal S197

15.P.06 Simulation of dendrite formations of aerosol particles on a single fibre. O. Lastow S199

15.P.07 Aerosol filtration by fibrous filters at intermediate Knudsen numbers. V. I. Roldughin and A. A. Kirsch S201

15.P.08 Multistage high efficiency air filtration. I. B. Stechkina and A. A. Kirsch S203

15.P.09 The minimization of the fold filter resistance under nonsteady filtration. S. V. Khudjakov, A. A. Kirsch and I. B. Stechkina S205

15.P.10 Aerosol control and monitoring system LADA. V. I. Kalechits, A. A. Kirsch, V. I. Kulibaba, O. Yu. Maslakov and Yu. V. Pavlov S207

15.P.11 Observation of fibrous filter surfaces loading with liquid aerosols by confocal microscopy. R. GOUGEON, D. BOULAUD, H. J. FISSAN, R. LANGE and A. RENOUX S209

15.P.12 Diffusive mask: calculation of main parameters. E. D. VOROBIEV, V. V. OVCHINNIKOV and G. V. LYUBIMOVA S211

Aerosol Production Technology

16.P.01 Generation of aerosol free space by the low energy electron particulate removing system—clean box technology. J.-S. CHANG S213

16.P.02 The effect of black liquor characteristics on combustion aerosols in industrial recovery boilers. P. MIKKANEN, E. I. KAUPPINEN, J. K. JOKINIEMI and M. MÄKINEN S215

16.P.03 Models for discharge and evaporation in electrospray pyrolysis. J.-C. LIN, Y.-C. CHANG, J. W. GENTRY and M. B. RANADE S217

16.P.04 Generation of metal titanate powders by spray pyrolysis using single-source precursors. C. D. CHANDLER, Q. POWELL, M. J. HAMPDEN-SMITH and T. T. KODAS S219

16.P.05 Aerosol-assisted chemical vapor deposition of copper. C. ROGER, T. S. CORBITT, T. T. KODAS and M. J. HAMPDEN-SMITH S221

16.P.06 AC-charging of aerosol particles. P. H. W. VERCOULEN, J. W. HENNIPMAN, J. C. M. MARIJNISSEN and B. SCARLETT S223

16.P.07 Evolution of aerosol size spectra at haloidbenzenes photonucleation. S. N. DUBTSOV, K. P. KUTZENOGII, A. N. LEVYKIN and G. I. SKUBNEVSKAYA S225

16.P.08 Design of photochemical-type aerosol generators for aerosol spectrometers calibration. S. N. DUBTSOV and A. M. BAKLANOV S227

16.P.09 Identification of gas and aerosol products in haloidbenzenes photonucleation. G. I. SKUBNEVSKAYA and S. N. DUBTSOV S229

16.P.10 A new monosized drop generator: monitoring of isolated drop or drop packet. J. BLAISOT, M. LEDOUX, D. DUCRET and J. VENDEL S231

16.P.11 The ultrasonic generation of droplets for the production of submicron size particles. J. CHARUAU, P. TIERCE and M. BIROCHEAU S233

16.P.12 A mobile short-term-sequential sampling device to measure air pollutions caused by an industrial source. H. MACHOLDT and F.-W. RICHTER S235

16.P.13 Charged water drops as an ion source. I. COLBECK and X. D. XIANG S237

16.P.14 Laser-induced breakdown spectra of Ti-aerosol. JU. A. BIKOVSKY, D. A. UZIENKO and V. V. ZAPOV S239

16.P.15 Dust particle collection efficiency of cold precharger and pulse energized electrostatic precipitator under heavy dust loadings. J. S. CHANG, P. C. LOOY, A. A. BEREZIN, S. JAYARAM, G. S. P. CASTLE, R. MANGAL and M. MOZES S241

16.P.16 Cadmium atoms as condensation nuclei. M. N. BALDIN, G. G. KODENYOV, V. A. SOLOMONOV and Y. E. SUTKIN S243

16.P.17 Generation of condensation nuclei by DC electrical discharges in point to plane configuration. J. P. BORRA, A. GOLDMAN, M. GOLDMAN, A. ROOS and D. BOULAUD S245

Radioactive and Nuclear Aerosols

17.P.01 Experimental studies on hygroscopic aerosol behaviour in LWR containment conditions. J. M. MÄKYNEN, J. K. JOKINIEMI and E. I. KAUPPINEN S247

17.P.02 Use of an annular diffusion channel for a time integrated measurement of the "unattached" fraction of radon-222 progeny. D. KEROUANTON, G. TYMEN and D. BOULAUD S249

17.P.03 Measurements of indoor number size distributions and activity size distributions of ^{218}Po. C. ZOCK, J. PORSTENDÖRFER and A. REINEKING S251

17.P.04 Actual calibration of instruments measuring the radioactivity of aerosols. J. CHARUAU, L. GRIVAUD, S. FAUVEL, D. FERTMAN and Y. SELDIAKOV S253

17.P.05 Modelling of boron species for the integral test FAL-17. M. LAZARIDIS, J. A. CAPITÃO and Y. DROSSINOS S255

17.P.06 Development and application of a model on vapor nucleation and condensation onto aerosols. E. HONTAÑÓN and A. ALONSO S257

17.P.07 Analyses of experiments on the effect of boric acid on caesium transport with the RAFT and VICTORIA computer codes. E. HONTAÑÓN, M. LAZARIDIS and Y. DROSSINOS S259

17.P.08 Condensational growth of soluble particles. A. V. MOSKOVCHENKO S261

17.P.09 The hydrodynamic stability of ultra thin liquid film on the surfaces of unsoluble aerosol particles. A. V. MOSKOVCHENKO and V. YE. SMORODIN S263

17.P.10 Aerosol particle losses in the sampling tubes of nuclear facilities: assessment and experimental determination. K. VOGL S265

17.P.11 Study of aerosol deposition in large pipes: Transat programme. V. SALDO, E. VERLOO, T. ALBIOL and F. SABATHIER S267

17.P.12 Radioactive aerosols near Chernobyl in 1986–1992. B. I. OGORODNIKOV, A. K. BUDYKA and V. I. SKITOVITCH S269

17.P.13 Monitoring of radioiodine in air. N. B. BORISOV, A. K. BUDYKA, V. V. VERBOV and B. I. OGORODNIKOV S271

17.P.14 The growth of hygroscopic aerosol in humid atmosphere. F. SABATHIER, A. ZOULALIAN, T. ALBIOL and V. LAYLY S273

17.P.15 Design of the test matrix for POSEIDON pool scrubbing experiments using the BUSCA-PSI code. A. DEHBI, S. GUENTAY and D. SUCKOW S275

Aerosol Chemistry

18.P.01 Production of $BrNO_2$, Br_2 and $ClNO_2$ from the reaction between sea spray aerosol and N_2O_5. W. BEHNKE, V. SCHEER and C. ZETZSCH S277

18.P.02 Chemical effects induced by pneumatic aerosol generation from spring waters used in E.N.T. spa medicine. F. CLANET and S. DUCOS-FONFREDE S279

18.P.03 Formation of coarse particle nitrate aerosol in southern coast of Finland. T. A. PAKKANEN, M. MÄKINEN, R. E. HILLAMO, T. MÄKELÄ, A. VIRKKULA and V.-M. KERMINEN S281

18.P.04 Collection by a cylindrical denuder of nicotine evaporating from mainstream tobacco smoke. D. A. LEWIS, I. COLBECK and D. C. MARINER S283

18.P.05 Sublimation and dissociation of suspended NH_4Cl particles at high temperatures. G. N. SCHADING and P. ROTH S285

18.P.06 Identification of gas and aerosol products in haloidbenzenes photo-nucleation. G. I. SKUBNEVSKAYA and S. N. DUBTSOV S287

19.O.01 In-situ and on-line analytical chemistry of aerosols. R. NIESSNER S289

19.O.02 PMS measurements of charged particles formed in premixed $H_2/O_2/Ar$ low pressure flames doped with SiH_4 and $TiCl_4$. D. LINDACKERS, M. G. D. STRECKER and P. ROTH S293

19.O.03 Surface-analytical investigations on the water up-take of toluene-treated combustion aerosol particles before and after exposure to NO_2. F. FAUDE and J. GOSCHNICK S295

19.O.04 Humidity dependent X-ray diffraction—a new way to investigate deliquescence properties of hygroscopic salts in ambient aerosol samples. B. KLAUE and W. DANNECKER S297

19.O.05 Ion balance of fine particle atmospheric aerosol in Northern Finland. M. MÄKINEN, T. PAKKANEN, R. HILLAMO, A. VIRKKULA and T. MÄKELÄ S299

Fundamentals III

20.O.01 The fractal geometry of aerosol aggregates. R. JULLIEN S301

20.O.02 Dynamic behaviour of fractal soot aerosols. O. MÖHLER, K.-H. NAUMANN and W. SCHÖCK S303

20.O.03 Self-preserving distributions of agglomerates. S. VEMURY and S. E. PRATSINIS S305

20.O.04 Electrically enhanced agglomeration of nanosized aerosols. A. GUTSCH and F. LÖFFLER S307

20.O.05 The size and charge of droplets in the electrospraying of polar liquids in cone-jet mode, and the minimum droplet size. A. M. GAÑAN-CALVO S309

Spray Characterization

21.O.01 Recent developments in standardisation and calibration in the field of aerosol measurement. D. MARK and J. P. MITCHELL S311

21.O.02 Inertial classification of droplets produced by medical nebulizers. C. ROTH and J. GEBHART S313

21.O.03 Impactor based measurement of droplet spectra—application to medical inhalers. W. KOCH, G. POHLMANN and J. UTA S315

21.O.04 Phase Doppler Anemometry, method and latest developments. TH. WRIEDT and K. BAUCKHAGE S317

21.O.05 Droplet size distribution measurements for medical nebulizers by the forward light scattering technique ("laser diffraction"). H. G. MERKUS, J. C. M. MARIJNISSEN, E. H. L. JANSMA and B. SCARLETT S319

Emission Control

22.O.01 The role of inorganic aerosols in combustion and emission control. E. I. KAUPPINEN S321

22.O.02 Measurement and reduction of particles emitted from a two-stroke engine. J. PATSCHULL and P. ROTH S323

22.O.03 Product study of the electron beam induced degradation of volatile organic compounds (VOC). H. MÄTZING, K. HIROTA, K. WOLETZ and H.-R. PAUR S325

22.O.04 Coal combustion aerosol particle size distribution determination using low-pressure impactor and CCSEM methods. T. M. LIND, E. I. KAUPPINEN, J. K. JOKINIEMI, L. LILLIEBLAD and N. KLIPPEL S327

22.O.05 Particle transport in flat-plate and offset-plate electrostatic precipitator. Y. J. SUH and S. S. KIM S329

Aerosol Samplers

23.O.01 Assessment of workers' exposure in occupational hygiene by aerosol sampling. J. F. FABRIÈS S331

23.O.02 A new experimental facility for studying aerosol samplers. O. WITSCHGER, R. WROBEL, J. F. FABRIÈS, P. GÖRNER and A. RENOUX S333

23.O.03 The performance of a number of personal samplers in the assessment of bioaerosols. D. J. BIRCH and W. D. GRIFFITHS S335

23.O.04 Efficiency of aerosol sampling inlets in different air environments. S. A. GRINSHPUN, K. WILLEKE and S. KALATOOR S337

23.O.05 Wind tunnel testing of the sampling efficiency of personal inhalable aerosol samplers. D. MARK, C. P. LYONS, S. L. UPTON and L. C. KENNY S339

Characterization I

24.O.01 Recent advances in light scattering theory and optical particle characterization. G. GOUESBET S341

24.O.02 Characterisation of aerosols of pollutants for remote sensing applications. PH. ADAM S343

24.O.03 A novel technique for optical size determination of small aerosol particles. M. QUINTEN S345

24.O.04 Photon correlation spectroscopy for analysis of aerosols. M. A. VAN DRUNEN, B. SCARLETT and J. C. M. MARIJNISSEN S347

24.O.05 Fast spectral infrared photometry and retrieval of aerosol parameters. G. POSS, H. G. SCHEIBEL, W. RIEDEL, M. KNOTHE and R. ZAHORANSKY S349

Fundamentals

25.P.01 Forces upon droplets induced by external and internal concentration gradients. W. HOLLÄNDER and H. WINDT S351

25.P.02 Scaling of the acoustic agglomeration rate as a function of the wave energy. PH. CAPÉRAN, J. SOMERS, K. RICHTER and S. FOURCAUDOT S353

25.P.03 Agglomeration of a titanium dioxide aerosol in a high intensity sound field. J. SOMERS, PH. CAPÉRAN, K. RICHTER and S. FOURCAUDOT S355

25.P.04 Theoretical consideration of lattice models for suspensions. O. FILIPPOVA and D. HÄNEL S357

25.P.05 Influence of particle evaporation on shock-wave induced coagulation. J. J. F. STRECKER, S. M. FROLOV and P. ROTH S359

25.P.06 Evaporation of an aerosol particle under the effect of radiation. V. G. CHERNYAK S361

25.P.07 Eulerian approach for numerical simulation of multi-phase flow. C. H. THILL and D. HÄNEL S363

25.P.08 Binary ice nucleation in adsorbed films on compacted SiO_2 particles. A. BOGDAN, B. GORBUNOV, A. KRUPPA and M. KULMALA S365

25.P.09 Selfpreserving size distributions in source enhanced coagulating systems. A. A. LUSHNIKOV S367

25.P.10 Thermophoretic deposition efficiency in tube flow. P. DUMAZ S369

25.P.11 Effect of the embryo instability and heterogeneous nucleation. V. YE. SMORODIN and V. V. RYAZANOV S371

25.P.12 Continual models, based on Fokker–Plank equation, for inertial particles motion in laminar and turbulent flows. A. B. VATAZHIN and A. YU. KLIMENKO S373

25.P.13 Concept of particle size in the nanometer range. H. TAMMET S375

25.P.14 On the precritical stage of nucleation. A. A. LUSHNIKOV S377

25.P.15 Test cases for examination of fractal dimensions. S. H. CHENG, J. C. LIN, J.-R. WU and J. W. GENTRY S379

25.P.16 Photonucleation research of nitroaromatic compounds. V. B. MIKHEEV S381

25.P.17 Brownian coagulation in the transition regime III: self preserving size distributions. E. OTTO, F. STRATMANN, H. FISSAN, S. VEMURY and S. E. PRATSINIS S383

25.P.18 The mechanical break-up of the liquid in the electric field. A. V. KOLPAKOV, V. M. BEREZHNOI, L. V. MALIAROVA and E. I. TITOVA S385

25.P.19 Statistical hydromechanics of two-phase media. V. YA. RUDYAK and A. A. BELKIN S387

25.P.20 Evolution of aerosol size spectra at haloidbenzenes photonucleation. S. N. DUBTSOV, K. P. KUTZENOGII, A. N. LEVYKIN and G. I. SKUBNEVSKAYA S389

25.P.21 Construction of the explosion waves theory for combustible aerosols. S. K. ASLANOV S391

25.P.22 Bimodal size distribution of aluminum aerosol formed within thermal boundary layer around evaporating metal drop. V. B. STOROZHEV S393

25.P.23 Order of magnitude analysis of the equations of motion of a particle in a non-uniform unsteady flow. P. ARMAND, A. MONAVON, P. CORNET and M. DURIN S395

25.P.24 Influence of surfactants on dispersion of superheated liquid and stabilization of obtained aerosol systems. N. KH. KOPYT, YU. I. BOIKO and A. I. STRUCHAYEV S397

25.P.25 Ice-nucleating bacteria and its bioenergetics in process of the non-equilibrium water phase transitions. V. YE. SMORODIN S399

25.P.26 Modelling of the effects of fractal geometry on heterogeneous catalysis. A. V. FILIPPOV and A. SCHMIDT-OTT S401

25.P.27 Determination of the power-law prefactor ϵ for fractal agglomerates. S. NYEKI and I. COLBECK S403

25.P.28 Effect of the concentration of aerosol particles on the efficiency of their deposition in a flow thermal diffusion chamber. S. P. BAKANOV and V. V. VYSOTSKY S405

25.P.29 Thermal polarization of bodies in the rarefied gas flow and thermophoresis of aerosols. S. P. BAKANOV and V. V. VYSOTSKY S407

25.P.30 On the effect of volatility on thermophoresis of aerosols. S. P. BAKANOV S409

25.P.31 Size-related change of lattice parameters in NiO nanoparticles. M. Y. GAMARNIK S411

25.P.32 Investigation of the heat transmission processes on the boundary vapour-water. S. B. KUDRITSKY, L. V. MALIAROVA and E. M. DMITRIEVA S413

25.P.33 Ultrathin wires with near atomic diameters. Y. A. KUMZEROV S415

25.P.34 Receiving micro-nanoparticles in neutral and gases with low activity. A. V. SUSLOV, M. A. TRUNOV and K. I. SEMIONOV S417

25.P.35 Effect of vertical directional shear of horizontal wind on cross-wind dispersion of aerosols in the barotropic atmospheric boundary layer. V. M. VOLOSHCHUK and A. I. KUPRIYANCHUK S419

25.P.36 Stability of the plane Poiseuille flow of dilute particle–fluid mixture. V. YA. RUDYAK and E. B. ISAKOV S421

25.P.37 CIDNP study of the processes of cluster formation in the gas phase. A. A. OBYNOCHNY, A. G. MARYASOV, P. A. PURTOV and A. V. POPOV S423

25.P.38 Investigation of the aerosol transport as a "passive" impurity by photometring of colorimetrical complexing agents. A. I. STRUCHAYEV and G. I. SAVENKO S425

25.P.39 The effect of electrical charging and dispersion in aerosol coagulation. P. H. W. VERCOULEN, S. VEMURY, S. E. PRATSINIS and J. C. M. MARIJNISSEN S427

25.P.40 The absence of stationary states at free coagulation regime. V. V. RYAZANOV and S. G. SHPYRKO S429

25.P.41 Stationary coagulation regime with evaporation. V. V. RYAZANOV and S. G. SHPYRKO S431

25.P.42 Stationary nonequilibrium states of monodisperse aerosol clusters system and Smolukhovsky's equation with external influences. V. V. RYAZANOV S433

Spray Characterization

26.P.01 Thermodynamic change of the size of aqueous solution droplets in particle counters. G. A. FERRON and B. BUSCH S435

26.P.02 Aerosol sizing by means of laser diffraction for the characterisation of pump sprays, propellant sprays and inhalers. W. F. G. WITT and S. K. RÖTHELE S437

26.P.03 Output characterization of medical nebulizers. M. KNOCH, E. WUNDERLICH, C. ROTH and J. GEBHART S439

26.P.04 Response of an advanced near forward light scattering measuring setup to PSL-aerosols. C. PETERS and A. RUDOLPH S441

26.P.05 Feasibility study of in-situ sizing of 0.1 μm particles. J. KILDESOE and P. BUCHHAVE S443

26.P.06 The generation of micro-machined particle aerosols for characterising aerosol samplers. A. D. MAYNARD S445

26.P.07 Design and development of the LPC-1-200 liquidborne particle counter. A. CZITROVSZKY and P. JANI S447

Emission Control

27.P.01 Growth of acid aerosol droplets in humid air. K. SCHABER, A. SCHENKEL and A. KOCH S449

27.P.02 Particle trajectory visualization inside a wire-plate electrostatic precipitator. S. J. PARK and S. S. KIM S451

27.P.03 A study of models and experiments involving aerosol impaction in bends, changes of cross-section and simple junctions. M. P. KISSANE, N. ABKARI and M. AIT-AMMI S453

27.P.04 Efficient multiple charging of diesel particles by photoemission. M. MOHR, D. MATTER and H. BURTSCHER S455

27.P.05 Particle collection by small cyclones as a function of flow rate, geometric dimensions and particle size. M. MAUNZ and H. BÜTTNER S457

27.P.06 Separation of submicron particles supported by heterogeneous condensation. S. SCHABEL, S. HEIDENREICH, B. A. SACHWEH, H. BÜTTNER and F. EBERT S459

27.P.07 Source characteristics of emitted aerosol in the size range 0.02 to 10 μm at pigment handling in dye manufacturing. M. BOHGARD, M. T. ANDERBERG and A.-K. EKHOLM S461

Aerosol Samplers

28.P.01 Aspiration efficiency of a thin-walled sampling probe at a yaw orientation of 180°. D. B. INGHAM, X. WEN, N. DOMBROWSKI and E. A. FOUMENY S463

28.P.02 Efficiency of sampling by the APC-03-2A single-particle counter. A. CZITROVSZKY and P. JANI S465

28.P.03 The use of polydisperse polystyrene aerosols, with rough surfaces, for determining sampler characteristics with a time-of-flight instrument. G. LIDÉN, A. GUDMUNDSSON and B. PAULSSON S467

28.P.04 Respirable aerosol sampler accuracy measurement. D. L. BARTLEY S469

Health Aspects

29.P.01 Traffic air pollution. T. MYRAN and T. HEDALEN S471

29.P.02 Aerosol exposure in collection of domestic waste. N. O. BREUM, B. H. NIELSEN, E. M. NIELSEN and O. M. POULSEN S473

29.P.03 Atmospheric aerosol pollutants and lung cancer measurements in Germany. K. R. SPURNY S475

29.P.04 Laboratory measurements of respirable particles formed during ski waxing. K. HÄMERI, P. AALTO, M. KULMALA and E. SAMMALJÄRVI S477

29.P.05 Effect of heart rate and lung inflation on aerosol derived effective airway dimensions. R. SIEKMEIER, G. SCHEUCH and W. STAHLHOFEN S479

29.P.06 A numerical study of the factors affecting worker exposure to contaminant. S. J. DUNNETT S481

29.P.07 The effect of blocked bronchial airways on particle deposition patterns within airway bifurcations. I. BALÁSHÁZY and W. HOFMANN S483

29.P.08 A new method for determining the effectiveness of personal protection when using Type II microbiological safety cabinets (M.S.C.). J. C. TEXTE, M. B. ATTOUI, A. RENOUX, G. J. MADELAINE and M. MONTAMAT S485

29.P.09 Thoracic fraction measurement of cotton dust. P. GÖRNER, J. F. FABRIÈS and R. WROBEL S487

29.P.10 Detection of beginning lung emphysema in asymptomatic middle-aged smokers by a single breath aerosol inhalation technique. R. SIEKMEIER, J. GEBHART and H. KRONENBERGER S489

29.P.11 Magnetopneumographic estimation of particle phagocytosis in the human lung. W. BARTH, W. MÖLLER, W. POHLIT, W. STAHLHOFEN and J. WIEGAND S491

29.P.12 Internal penetration of three models of Higgins–Dewell-type cyclones. A. GUDMUNDSSON and G. LIDÉN S493

29.P.13 Release of cytokines by quartz and coal mine dust exposed macrophages. U. GRIWATZ and N. H. SEEMAYER S495

29.P.14 Mutagenic effect of airborne particulates on rodent tracheal epithelial cells in vitro. N. H. SEEMAYER, C. HORNBERG and W. HADNAGY S497

29.P.15 The effect of inhaled ipratropiumbromide powder on aerosol derived effective airway dimensions. R. SIEKMEIER, H. KRONENBERGER and W. STAHLHOFEN S499

29.P.16 Influence of asthma bronchiale on convective gas transport in patients with asthma bronchiale. R. SIEKMEIER, CH. F. SCHILLER-SCOTLAND and W. STAHLHOFEN S501

29.P.17 Cytomagnetometry with J774-macrophage cells—influence of shear-stress on the rheology of the cytoplasm. W. MÖLLER and W. STAHLHOFEN S503

29.P.18 Comparison of particle deposition patterns in human and rat lungs. W. HOFMANN and L. KOBLINGER S505

29.P.19 Are diesel particulate emissions a threat to public health? D. LAFON, C. CHINI, G. AUBURTIN, M. OULD ELKHIM and A. NONAT S507

Characterization

30.P.01 LIDAR development for remote sensing of atmospheric pollutants. PH. ADAM S509

30.P.02 Coherence of a light field in an optically dense aerosol layer. A. A. KOKHANOVSKY and E. P. ZEGE S511

30.P.03 A new laser particle sizer for powder. E. P. EMETS, V. G. EFANKIN, G. YU. KOLOMEYTSEV, P. P. POLUEKTOV and V. V. TIMONIN S513

30.P.04 Laser multipurpose system of aerosol investigation. E. P. EMETS and P. P. POLUEKTOV S515

30.P.05 Light scattering and absorption by large aerosol particles: geometrical optics approximation with regards to the edge effects. A. A. KOKHANOVSKY and E. P. ZEGE S517

30.P.06 Sizing of dispersed limestone powder using five different instruments. J. KILDESOE S519

30.P.07 Application of single and double pulsed Fraunhofer in-line holography in cloud physics. E. M. UHLIG, R. JAENICKE and S. BORRMANN S521

30.P.08 Particle sizing of highly concentrated monodisperse aerosols. J. ALTMANN, A. RUDOLPH and B. WESSELY S523

30.P.09 Determination of submicronic particle size distribution by means of polarized light: application to condensation nuclei and turboreactors. P. HERVE, A. KLEITZ, A. HAMOUDA and B. LEPORCQ S525

30.P.10 Filter disc resonance: a new technique for mass concentration measurement. P. LILIENFELD S527

30.P.11 A new test rig for intercalibration of aerosol particle sizing instruments. E. SCHMIDT, R. HUMMEL and W. SCHULZE S529

30.P.12 Chemical characterisation of nano particles via multiple photoelectric charging. W. FENDEL and A. SCHMIDT-OTT S531

30.P.13 Workshop on intercomparison of condensation nuclei and aerosol particle counters, Vienna, 1993: an overview. A. ANKILOV, A. BAKLANOV, M. COLHOUN, K.-H. ENDERLE, D. FILIPOVICOVA, J. GRAS, YU. JULANOV, A. LINDNER, A. A. LUSHNIKOV, A. E. MAJEROWICZ, R. MAVLIEV, F. MCGOVERN, A. MIRME, T. C. O'CONNOR, J. PODZIMEK, O. PREINING, G. P. REISCHL, R. RUDOLF, G. SEM, W. W. SZYMANSKI, E. TAMM, P. E. WAGNER, W. WINKLMAYR and V. ZAGAYNOV S533

30.P.14 Chemical and analytical characterisation of atmospheric particulate samples. S. WEBER, A. N. DEDIK, J. ENSLING, P. HOFFMANN and H. M. ORTNER S535

30.P.15 Effect of thermal rebound upon diffusion battery data. A. S. SKAPTSOV S537

30.P.16 The potential of porous plate virtual classifiers for selection of monodisperse droplets from spray nebulizers. J. R. WU, J. W. GENTRY, G. SCHEUCH and J. GEBHART S539

30.P.17 Ion mobility measurements by Vienna type DMA and Faraday cup electrometer. J. M. MÄKELÄ and V. JOKINEN S541

30.P.18 Reconstruction of aerosol size distributions with diffusion battery TSI 3040. P. KOUTSENOGII S543

30.P.20 Phase Doppler anemometry with error-free measurement of large particles. P. HAUGEN and C. TROPEA S545

Health Aspects I

31.O.01 Health effects of mineral fibres. P. BROCHARD, J. C. PAIRON and J. BIGNON S547

31.O.02 Simulation of airflow in a physiologically realistic airway bifurcation model. T. HEISTRACHER and W. HOFMANN S549

31.O.03 Responses of the canine lungs during long-term exposure to a neutral sulfite and an acidic sulfate aerosol at low concentrations. J. HEYDER, I. BECK-SPEIER, P. DIRSCHERL, G. A. FERRON, E. KARG, W. G. KREYLING, A.-G. LENZ, K. MAIER, H. SCHULZ, S. TAKENAKA and A. ZIESENIS S551

31.O.04 Aerosol dispersion in human airways during one breathing cycle: the dependence of the aerosol penetration. G. SCHEUCH and W. STAHLHOFEN S553

31.O.05 Deposition of hygroscopic particles in the respiratory tracts. W. LUO and F. PETERSON S555

31.O.06 Dust and shotcrete tunneling: did the exposure situation improve over the years? G. PRAML, A. L. HARTMANN, R. KESSEL and G. FRUHMANN S557

Characterization II

32.O.01 Characterizing and classifying ultrafine aerosol particles with respect to selected properties. A. SCHMIDT-OTT S559

32.O.02 Technique to simulate the time-dependent signal of the pulsed lidar with the separately located illuminating and receiving platforms for the aerosol space sounding. V. I. OVOD and T. WRIEDT S561

32.O.03 Measurement of laser light transmission and backscattering in droplet aerosols. W. W. SZYMANSKI and R. RUDOLF S563

32.O.04 Multiple wavelength extinction measurements in highly concentrated aerosols under industrial conditions. W. SAMENFINK, A. TREMMEL, R. DITTMANN, S. WITTIG, K. SCHABER and A. SCHENKEL S565

32.O.05 On the limits of the particle concept. OTMAR PREINING N/A

32.O.06 Measurement of the properties of ultrafine iron oxide particles by means of on-line detection of particle magnetization, TDMA and STEM-analysis. TH. KAUFFELFT, H. LAKNER and A. SCHMIDT-OTT S567

Health Aspects II

33.O.01 Physical and biological aerosol penetration and face-seal leak characteristics of industrial and health-care respirators. K. WILLEKE, S. GRINSHPUN, Y. QUIAN, J. DONNELLY, A. JUOZAITIS and V. ULEVICIUS S569

33.O.02 Indoor aerosol deposition studies using rare-earth tagged particles. C. LANGE, J. ROED, M. A. BYRNE and A. J. H. GODDARD S571

33.O.03 The effects of aerosolisation parameters on the viability of bioaerosols. W. D. GRIFFITHS and D. J. BIRCH S573

33.O.04 Evaluation of protective equipment against biological aerosols in a containment cabinet. M. A. LABARRE, D. DESCROIX, J. L. GOASDOUE, P. SILVESTRE and C. TIRET S575

Characterization III

34.O.01 Environmental study of two analytical laboratories: comparison results of particles and metallic contaminations measurements. B. DELAHAYE, V. BANNERY, J. P. KOPKA, A. PRIGENT, P. MAINDRON, C. RATTI and C. RIGHEZZA S577

34.O.02 Concentration effects in field-flow fractionation. M. MARTIN and M. HOYOS S579

34.O.03 Evaluation of metallic impurities in electronic process gases by a particle counter. H.-C. WANG, R. UDISCHAS, G. DODDI and T. JACKSIER S581

34.O.04 Use of a sedimentation battery to determine size distribution of bioaerosols in the micrometric size range. C. DROAL, G. TYMEN, E. BOURGUEIL and D. BOULAUD S583

Addendum

14.P.21 Vertical gradient of particle concentration and variability of diffuse and direct solar radiation. M. KOCIFAJ S585
